EXPERIENCE

Front-End Web Development Intern, Kaching Media— 2019

May 19 – July 19 | Working Stack:HTML, CSS, Bootstrap, JS(ES6), Typescript, Angular
I worked in the Front-End Team of Kaching Media on their Web Application built in Angular. My responsibilities included implementing designs of the new features received from the designing team. I also built the Image Uploader cum Cropper module from scratch and helped in implementing the draggable widgets on the home screen

HealthForAll India— 2019

Sept 19-Nov 19 | HTML, CSS, Bootstrap, JS, jQuery, Java (JSP), Google App Engine.
The Project aims to reduce the hustle about a child's vaccinations. With this live Web-App we provide on time (and before time) reminders to a child's parents about his vaccinations. The web- app contains locators with which you can track nearest hospitals or paediatricians.

PROJECTS

[Ongoing]Intelligent Scanning System (Ministry Of Railways)— 2020

The project undertaken under the approval of Ministry of Railways as a Smart India Hackathon initiative aims to design a Non invasive, quick and cost effective way to check parcels in parcel offices (both booked by railways and leaseholders).

Neural Responses Program For Alzheimer's Detection

Nov 19-Jan 20|Working Stack:Python,OpenCV,Numpy,PyAutoGUI.
Clenching fists actually helps improve memory, it makes you feel better and is also known to boost confidence. This Gesture-Control Assistant for the Google Dinosaur Game comes with a lot of benefits. Based Upon the neural responses I was further able to design a mental health prediction model incorporating Microsoft Azure.

EDUCATION

ADGITM (FORMERLY NIEC)

B.TECH INFORMATION TECHNOLOGY

Expected graduation: **Jun 2022**

Current CGPA: **8.74**

College Rank: **15**

G.D. Goenka Public School

PASSED 2018 | NEW DELHI, INDIA

87.6% Agg. in 12th

10 C.G.P.A in 10th

SKILLS

PROGRAMMING

C, C++, Data Structures, Algorithms,
Competitive Coding.

DEVELOPMENT

HTML, CSS, Bootstrap, JavaScript(ES6),
TypeScript, MEAN (MongoDB, Express,
Angular, NodeJS) Stack, SQL.

TOOLS

Linux (UBUNTU), VSCode, Postman,
MongoDB Compass, MySQL Workbench
Git/GitHub.

CO-CURRICULAR

CODING CLUB Delhi: Mentor

Technorax'18: Robotics Event Organiser

Robogyan NIEC- Executive Member

Competitive Coding Bootcamp: Speaker

TechSoc: Competitive Coding Mentor

LANGUAGES

Linguistic Proficiency in English and Hindi

Autonomous Vehicle— 2019

Sept 19-Oct 19|Python and Pytorch Framework)

The project uses python using the pytorch framework along with concepts and algorithms of Machine learning and Deep learning. It uses Tensorflow as the deep learning framework.

Construct-O-Bot— 2019-20

Aug 19-Feb 20|Atmega 2560,Embedded-C,V-Rep Simulations

Construction Bot which traverses a path with varying obstacles such as, a zig-zag path and wall-following using SHARP sensors in the absence of no line.Bot's arm consists of a Bi-directional pickup and place mechanism of construction materials.A V-REP Simulation was also carried out before the hardware implementation of the same and the implementation of the A* path finding algorithm.

Mental Health Prediction Model— 2020

Jan 20-Feb 20|Python,Microsoft Azure Machine Learning Studio, Postman, C#

Deployed on the Azure web services, happiness is the request response code.The following includes the data which is read first,summarized next. Further it is normalised and trained.

Expression Detection Program— 2019

Oct 19-Dec 19|Working Stack: Python,OpenCV,Tensorflow

This project aims to classify the emotion on a person's face into one of seven categories, using deep convolutional neural networks. The model is trained on the FER-2013 dataset which was published on The International Conference on Machine Learning (ICML).

ESP8266 Forex Tracker— 2018-19

Nov 18-Feb 19|Node MCU/ESP8266 + Arduino Kit

This project demonstrates an advanced implementation using the ESP8266/NodeMCU along with the Arduino Uno.The ESP8266 connects to the internet via WiFi and grabs the EUR/USD Forex Rates every 10 seconds. Based on the movement of this value, it sends a UART message to the Arduino Uno (Rise / Fall / Unchanged) The Arduino Uno receives this UART message and accordingly lights up an indication LED (Green / Red / Yellow)

COLLEGE RESPONSIBILITIES

Executive Member,Robogyan NIEC, Robotics Society — 2019

I'm responsible for the organisation of all the events, sessions, bootcamps, talks and contests under Robogyan NIEC. I also encourage student participation in these events

Website Development and Maintenance, Robogyan NIEC.

ACHIEVEMENTS

**Facebook HACKER CUP-2018
(AUG 2019)**

Cleared Round 1

**CODECHEF SNACKDOWN
(NOV 2018)**

Cleared Round 1-A (Solo Team)

Inter-College Coding Contests

Winner: Blind Coding @GBPEC

Winner: Death Star @BVP

Winner: Robo Race @NSIT-D

Winner:CodeRex @NSIT-D

E-Yantra - Top 15 (South-Asia)
(Organized by IIT-B)

A frequent participant of the
Hackathon's organized by

Major League Hacking (MLH)
Community

CERTIFICATIONS

- Coding Blocks C++ Fundamentals
- Coding Blocks Standard Template Library Master Course
- Coding Blocks Competitive Programming
- Coding Blocks Dynamic Programming

OTHER INTERESTS

Stand-Up Comedy,
Oration,Music (Guitar, Keyboard,
Percussions
