EDUCATION

GURU GOBIND SINGH INDRAPRASTHA UNIVERSITY

B.TECH IN INFORMATION TECHNOLOGY

July 2022 | New Delhi, India | CGPA : 9.32 / 10

BHATNAGAR INTERNATIONAL SCHOOL

Secondary Education | Delhi, India | Score : 87.4%

High School | Delhi, India | CGPA : 9.2 / 10

EXPERIENCE

FLYFIN AI 🔗 | Bangalore, India

SOFTWARE ENGINEERING INTERN | Jun 2021 - Sept 2021

- Stealth VC backed B2C Fintech for the US market.
- Led and integrated automated E2E testing using **Detox** and **Jest**.
- Worked on optimising app performance by migrating from **Javascript** to **Typescript** and creating a **custom cache** module.
- Worked with the **Backend Team** to integrate testing into the **CI/CD pipeline**.
- Developed diverse prominent features/flows as a **Frontend Engineer**.

KACHING MEDIA 🔗 | New Delhi, India

SOFTWARE ENGINEERING INTERN | May 2020 - Aug 2020

- Rebuilt the website's front-end using **Next.js**.
- Developed **api endpoints** for internal ticketing system.
- Developed the Image Uploader and **Cropper module**.
- Optimized website performance, increasing the **PageSpeed** score to **above 85**.

POSITIONS

- **Competitive Programming Lead** at the CodeChef Campus Chapter and DSC ADGTM
- President, **Robogyan** 🔗
- **IncubateIND** 🔗 Fellow
- **Organizer** and **problem setter** for **DSA Carnival** 🔗 and **AlgoFlux** (Programming Contests)
- **Organizer** and **Speaker** for **LiveTheCode** 🔗
- Mentor at **GSSOC** 🔗
- Mentor at **The 10x Academy** 🔗

SKILLS

PROGRAMMING LANGUAGES

• C • C++ • Python • Javascript

DEVELOPMENT

• Reactjs • RestAPI • Node.js • Express.js • Firebase
• TypeScript • Jest • Detox • React Native • Redis

TOOLS

• VSCode • Git • Github • Linux • Postman • Docker

PROJECTS

CONTENT PERSONALIZATION 🔗 | TRELL

Feb 2021 – May 2021 | Reactjs, Redis, SQL

Worked on a personalized feed with product suggestions based on user insights and data dashboard for creators. Designed the wireframes, database and the backend architecture as per requirements. **In Production**.

INTELLIGENT SCANNING SYSTEM 🔗 | SIH 2020

Sept 2020 – Jan 2021 | React Native, Typescript, Python

The project was undertaken under the approval of Ministry of Railways and aimed to design a non-evasive, quick and cost effective way to scan parcels (both booked by railways and leaseholders).

STOCK CHAIN 🔗 | P&G GLOBAL INNOVATION CHALLENGE

Feb 2020 – May 2020 | Solidity, web3.js, Python, Reactjs

A decentralized AI ecosystem leveraging blockchain technology to allow users to boost transparency, trust and predictability among stores and provide better management for fast moving consumer goods.

CLENCH REX - ALZHEIMER'S DETECTION 🔗

Nov 2019 – Jan 2020 | Python, OpenCV, Microsoft Azure

Developed a program that helps you play the Google Dinosaur Game by using hand gestures and deployed a alzheimer's prediction model on Azure web services by scoring neural responses and comparing them with the threshold accordingly.

CONSTRUCT-O-BOT 🔗 | E-YANTRA

Aug 2019 – Jan 2020 | Atmega-2560, Embedded-C, V-Rep

Worked on a construction bot with a bi-directional pickup and place arm mechanism. Designed a V-REP Simulation before the hardware implementation of the same.
