ADDITIONAL EXPERIENCE

- HACKEREARTH** | Bangalore, India
CONTEST ADMIN | **Part Time** | Jun 2022 - Jun 2024
- Orchestrate and oversee **two monthly coding contests**, "HackerEarth Easy" and "HackerEarth DSA," from inception to execution.
 - Curate a diverse pool of problem setters to ensure a range of contest contributions.
 - Each contest consistently draws **5000+** participants.
 - Evaluate and select compelling contest themes.
 - Oversee question creation, testing, and editorial development.
 - Designing an exhaustive set of test cases for each problem to detect crucial logical and runtime errors while evaluating any other solution submitted for the same problem.

- MASAI SCHOOL** | Bangalore, India
DSA INSTRUCTOR | **Part Time** | Jan 2023 - Aug 2023
- Contributed to a Series B funded EdTech startup dedicated to transforming higher education accessibility.
 - Conducted weekly lectures, enriching the Data Structures & Algorithm curriculum to nurture job-market-ready graduates.
 - Employed comprehensive reporting and analysis to monitor student progress and achievements throughout the course.
 - Collaborated closely with the problem setting team, facilitating the application of acquired knowledge through custom question-solving exercises.

PROJECTS

- ASL BOT** | **MICROSOFT EMPOWERX**
Nov 2024 – Jan 2025 | Azure, Python, React.js
Developed a sign language interpretation and captioning tool for **Microsoft Teams** using avatars and **Azure OpenAI**, ensuring seamless UX, secure integration, and easy admin configuration.
- CAMPAIGN ENGINE** | **RAKUTEN**
July 2023 – Sept 2023 | Flask, Next.js, ChatGPT
Developed a **generative AI-driven** campaign engine for SEO professionals. Enabled targeted and data-driven campaigns, optimizing content generation and enhancing search rankings, organic traffic, and conversions.

- CONTENT PERSONALIZATION** | **TRELL**
Feb 2021 – May 2021 | React.js, Redis, SQL
Worked on a **personalized feed** with product suggestions based on user insights and data dashboard for creators. Designed the wireframes, database and the **backend architecture** as per requirements. **In Production**.

- INTELLIGENT SCANNING SYSTEM** | **SIH**
Sept 2020 – Jan 2021 | React Native, Typescript, Python
The project was undertaken under the approval of **Ministry of Railways** and aimed to design a non-evasive, quick and cost effective way to scan parcels (both booked by railways and leaseholders).

- STOCK CHAIN** | **P&G GLOBAL CHALLENGE**
Feb 2020 – May 2020 | Solidity, web3.js, Python, React.js
A decentralized AI ecosystem leveraging **blockchain technology** to allow users to boost transparency, trust and predictability among stores and provide better management for fast moving consumer goods.

- SMART TRAFFIC** | **CLEAN AIR ASIA**
Apr 2020 – Jun 2020 | Python, OpenCV, C++
Worked on a Smart Traffic Management solution and tested the same in real time on busy traffic light junctions. Won **Youth for Clean Air title and an Encouragement Award by Clean Air Asia**. The results were also presented in the **Air-Tech Fair 2021**.

EDUCATION

- GURU GOBIND SINGH INDRAPRASTHA UNIVERSITY**
B.TECH IN INFORMATION TECHNOLOGY
July 2022 | New Delhi, India | CGPA : 9.4 / 10

- BHATNAGAR INTERNATIONAL SCHOOL**
Secondary Education | Delhi, India | Score : 87.4%
High School | Delhi, India | CGPA : 9.2 / 10

SKILLS

- PROGRAMMING LANGUAGES**
• C • C++ • Java • Python • Javascript • Golang
- DEVELOPMENT**
• React.js • GraphQL • RestAPI • Node.js • Express.js
• Firebase • TypeScript • Jest • Detox • React Native
• Redis • Terraform • Jsonnet • Kafka • RabbitMQ
• Django • MongoDB • Cursor • Prompt Engineering
• LLM Integrations (chatbots, summarizers)
- TOOLS & PLATFORMS**
• Kibana • Git • Github • Linux • Postman
• Codeium • Github Copilot • AWS • Docker

EXPERIENCE

- GRAB** / **GXS** | Bangalore, India | One-North, Singapore
SOFTWARE ENGINEER | Aug 2022 - Present
- Founding engineer** of **Grab's DigiBank** team, later spun off into GXS Bank; led the end-to-end design and development of the digital lending platform **from scratch (0→1)**.
 - Built and scaled** core lending microservices—loan origination, credit decisioning, risk assessment, and repayment—powering credit products across **Singapore, Indonesia, and Malaysia**.
 - Collaborated cross-functionally with product, infra, and compliance teams to ensure scalability, fault tolerance, and regulatory alignment across financial systems to handle **millions** of users and **thousands** of concurrent loan applications **daily**.
 - Developed a robust loan **simulator** and **credit decision engine**, enabling accurate, real-time calculations and seamless distribution of **\$10B+** in loans.
 - Replaced legacy **Appian** workflows with a custom **in-house engine**, resulting in **3×** faster processing and **30% cost savings**.
 - Integrated **smart contracts** with **Thought Machine** for regulatory-compliant core banking and lending logic.
 - Led development of **Grab Wallet**, integrating multiple payment methods, improving scalability and reducing transaction failures by **40%**, while driving a **20% increase** in user adoption.
 - Optimized merchant payout** pipelines and reconciliation systems, achieving real-time settlements (**T+2→T+0**) and reducing transaction failures significantly.
 - Designed and built** insurance microservices for **Grab-Insure** (policy issuance, inventory tracking) and contributed to the roll-out of localized investment offerings via **Grab-Invest**.
 - Implemented 90%+ test coverage with Gandalf integration tests; orchestrated **Flyway-based DB migrations** and set up **Grafana** dashboards using **jsonnet** for real-time monitoring.
 - Tech Stack:** Golang, Python, Java, AWS.

- AMAZON** | Bangalore, India
SOFTWARE ENGINEERING INTERN | Jan 2022 - July 2022
- Collaborated with the International Technology Business team to enhance **Amazon Vendor Services (AVS)** efficiency across the Europe region.
 - Enhanced **AWS Lambda** performance by **40%** through the implementation of **CloudAuth token priming** for downstream operations within the Vendor Hub Portal.
 - Elevated team credit score by optimizing AWS ECS cluster sizes for HEX-AWS LPT services, reducing DIG costs from **\$0.88 to \$0.26** and increasing median of max CPU utilization from 8% to 18%.
 - Developed a status and commenting widget for Turismo Home, facilitating vendor evaluation of **Joint Business Plans and diverse KPI metrics**.
 - Integrated APIs** to surface **real-time KPI** data such as sell-through rates, forecast adherence, and out-of-stock metrics, **improving vendor transparency and planning**.
 - Created dashboards using **CloudWatch** and **QuickSight** for **internal metrics** monitoring and resource optimization tracking.
 - Tech Stack:** Java, React, Typescript, AWS, Javascript, Redux.

- FLYFIN AI** | Bangalore, India
SOFTWARE ENGINEERING INTERN | Jun 2021 - Sept 2021
- Stealth VC backed **B2C Fintech** for the US market. **A.I. tax engine** for freelancers & the self-employed.
 - Spearheaded the implementation and integration of comprehensive **end-to-end testing** utilizing **Detox** and Jest frameworks.
 - Played a pivotal role in optimizing application performance by orchestrating a migration from JavaScript to TypeScript and introducing a tailored cache module.
 - Collaborated closely with the Backend Team to seamlessly integrate testing procedures into the CI/CD pipeline.
 - Leveraged expertise as a Frontend Engineer to architect and develop a variety of prominent features and user flows.
 - Tech Stack:** React Native, Typescript, Javascript, Detox.

ACHIEVEMENTS AND AWARDS

- Won **1st place** in the **Microsoft EmpowerX Challenge** for building an ASL interpretation and captioning tool with avatars and **Azure OpenAI**.
- Ranked in the Top 10 at Rakathon 2023, showcasing my expertise in **AI-driven SEO solutions**.
- Won **Rolls Royce R²** Hackathon for **innovative air travel** route identification in emerging markets.
- Secured victory in Youth For Clean Air Hackathon, project **showcased at Air-Tech Fair**.
- Smart India Hackathon winner**, solving Ministry of Railways challenge.
- LeetCode top 0.01%**, 2325 rating; **Among top 30** Indian programmers across multiple programming platforms.
- Google Kick Start:** Placed **Among top 20** programmers (Rounds A, C, D, F).
- Meta Hacker Cup:** Round 1 - Global rank 44, Round 2 - Global rank 79.
- Special prize at Zeta Hacks, **among top 10 teams**.
- Repeated ACM-ICPC Regionals (2020 and 2021)** qualification, part of the top-ranked university team.
- Trell Hackathon 1st Prize**, **implemented feature in production**.
- TCS Codevita** excellence: Round 2 - Global rank 62, Round 3 - Global rank 22.
- P&G Global Innovation Challenge** finalist (25/10,000+).
- Top 5 Ranking in Eyantra **Robotics Competition**, earning a summer internship offer at **IIT Bombay**.
